

ABAYO Moise

Penetration tester || Full-stack developer

Email: abayomoise950@gmail.com

GitHub: github.com/A2kmoise

Profile Summary

Cybersecurity-first Full-Stack Developer with a strong background in secure application design, penetration testing, and scalable backend systems. Passionate about building modern web applications and mobile apps that are not only fast and responsive, but resilient against threats. Proven ability to work across the full stack — from intuitive React interfaces to secure Spring Boot APIs.

Technical Skills

- ❖ **Languages:** JavaScript, TypeScript, Java, Python, php
- ❖ **Frontend:** React, React native, Tailwind CSS, Bootstrap
- ❖ **Backend:** Node.js, Nest.js, Spring Boot, Express
- ❖ **Databases:** PostgreSQL, MySQL, MongoDB
- ❖ **Security:** Ethical Hacking, JWT
- ❖ **DevOps & Tools:** Docker, Git, GitHub Actions

Experience

Cybersecurity Consultant

I've been learning cybersecurity from 2024,

- ❖ Participated in the CTFs and completed the lessons about networking and penetration testing at platforms like **TryHackMe**, **Hack The Box**, and others.
- ❖ Contributed to GitHub repositories focused on the cybersecurity tools.

Developer Intern

I've been learning programming from 2024,

- ❖ I have made full-stack project including some designed for solving public problems.
 - ❖ I have also made some scalable APIs ready for use freely.
-

Personal Projects & Interests

- ❖ Competing in online cybersecurity competitions (TryHackMe, HackTheBox).
- ❖ Creating and maintaining CLI tools for penetration testing.
- ❖ Exploring full-stack performance optimization.
- ❖ Community participation in cybersecurity forums and event and exploring Cybersecurity.
